SUMMARY

I am a Data Engineer with extensive experience in developing robust data pipelines and optimizing data flow. My educational background from IIT Bombay has equipped me with strong technical and analytical skills, allowing me to contribute significantly to impactful projects. I excel in collaborative environments, eager to leverage data to drive business decisions.

EXPERIENCE

Data Engineer
Reliance

06/2021 - Present
Mumbai, India

A leading telecommunications and digital services company in India.
- Developed and maintained data pipelines for large-scale data processing.
- Collaborated with data scientists to implement machine learning models into production.
- Optimized existing databases which resulted in a 30% performance improvement.

EDUCATION

Bachelor of Engineering in Computer Science
IIT Bombay

08/2018 - 05/2021
Mumbai, India

LANGUAGES

English — Proficient ● ● ● ● ○   Nepali — Native ● ● ● ● ●

STRENGTHS

🏆 **Analytical Thinker**
Strong analytical skills with a knack for turning data into actionable insights.

⭐ **Effective Communicator**
Excellent communication skills, capable of conveying technical concepts to non-technical stakeholders.

✨ **Detail-Oriented**
Detail-oriented and organized, ensuring all data processes adhere to high standards of quality.

KEY ACHIEVEMENTS

⭐ **Enhanced Data Processing Speed**
Successfully implemented a real-time data processing pipeline that improved reporting speed by 50%.

☆ **Machine Learning Integration**
Led a project that integrated machine learning models into production, significantly improving decision-making processes.

SKILLS

Hard Skills
Python · SQL · Apache Spark · Hadoop · Data Warehousing

Soft Skills
Team Collaboration · Problem Solving · Adaptability
